

“Secure your investment, *crowfund* with us”

With Bricx, Relam will give all investors an alternative online investment platform. The platform will allow investors to access huge opportunities in revolutionary technology features that allows customers direct access to professionally managed diversified markets in both commercial and residential real estate assets assuring a high investment security algorithm through the implementation of blockchain ledger system and Escrow account banking system.

Bricx comes with the latest knowledge-based technology that will provide:

- Virtual Reality and 3D modeling features with interactive solutions.
- AI support services.
- Full-fledged Investment management system.
- KYC with WorldCheck and other Compliance Entities.
- Online Property Exhibition.
- Online Sales.
- Online Auctions

- Online Ads.
- Online Auctions
- Dedicated Investment advisor.

Bricx rely on blockchain technology to complete the full approval process from concerned departments along with conducting all the KYC checkups for both Investor and Developer/Property owners. Bricx will also reflects all payments according to the approved payment plan provided by the developer, where the all invested money will be retained in an escrow account and will only be released if the developer reached the payment milestone and got all the approvals required to release the payment. In addition, Bricx is:

- A decentralized real estate crowdfunding platform that connects small and large-scale investors with real estate investment opportunities globally.
- Will be offered directly to investors online, without any brokers Interference.
